DETAILED ACTION

1. Applicant has overcome the double patenting rejection based on the 10/826,535 application. However, for reasons unknown, Examiner Eickholt did not make a double patenting rejection based on the patent issued to the application which is the parent of this application. The following double patenting rejection appears appropriate.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 17 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,720,131. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of U.S. Patent No. 6,720,131 recites all the steps of claim 17 of the present application.

Similarly, claims 18-19 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 18-19, respectively, of U.S. Patent No. 6,720,131. Each of claims 2-3 of U.S. Patent No. 6,720,131 recite all the method steps recited in each of claims 18-19, respectively, of the present application.

Art Unit: 2854

4. Claim 20 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,720,131 in view of Gonzalez (US 2003/0025756).

Claim 1 of U.S. Patent No. 6,720,131 discloses the recited method of claim 20 of the present application except for the jetting printhead being stationary. However, Gonzalez teaches that it is known to interchange scanning jetting heads with stationary jetting heads as mentioned in paragraph [0002] of Gonzalez. It would have been obvious to combine the teaching of Gonzalez with the method disclosed by Claim 1 of U.S. Patent No. 6,720,131 for the advantage of the reduction of movable parts and thus the reduction of wear in the apparatus.

Allowable Subject Matter

5. Claims 1-16 are allowed.
